

Idhammar Mobile MMS

Working smarter with Smartphone technology

Flexible Software for Maintenance Professionals

Computerised Maintenance Management Systems (CMMS) continue to be one of the most advanced and useful investments available to industry today. Regardless of the size of your business, a CMMS can provide significant benefits to the professional maintenance management of your organisation, and deliver savings to the bottom line.

Organisations with assets in wide-ranging or “dark” locations require more a more flexible maintenance on the move. Additionally, many manufacturing organisations are realising the benefits of releasing their Maintenance professionals from their desk, empowering them to move around as needed.

Mobile Maintenance from Idhammar

Idhammar MMS provides mobile functionality for iOS and Android devices, synchronising engineers’ Work Orders wirelessly with the central CMMS, meaning the maintenance system is always close at hand.

Idhammar MMS is compatible with any authentic and reputable smartphone or tablet device

Idhammar OEE

Vital production support toolkit for Manufacturing Managers

Idhammar MMS

Designed for Maintenance Engineers, by Maintenance Engineers

Idhammar WCM

Automating World Class Manufacturing methodologies

In Brief

- Engineers can complete Work Orders in the field, in real time
- Photo & video capabilities
- Improves accuracy, reporting and traceability of inspection rounds
- Eliminates paperwork and improves efficiency

- No IT hardware or infrastructure investment
- Compatible with the latest smartphone and tablet hardware
- Automatic updates
- Internal or external hosting

Empower your Engineers with Idhammar Mobile MMS

Idhammar Mobile MMS Features

- Update work orders, record completed jobs, allocate time, and create new work orders in the field, in real time
- Get all relevant documentation and safety instructions in the palm of your hand
- Technicians, line operators, managers and Maintenance Planners are able to allocate work to individual engineers, sent straight to their device
- Take a photograph or video of an issue and attach it to the Work Order straight away with your mobile or tablet. No need to rely on memory or just words
- Tick off condition checks, capture measurements and record asset status with ease
- Complete stock checks and asset manifests based on location, or rotating check date using RFID, QR or bar code technology
- Transact stock issues and returns using bar code technology

Idhammar Mobile MMS Key Benefits

- 1 Key staff are always available, whether at their desk, working in operational areas or off-site
- 2 Eliminates paperwork and improves efficiency through real-time information visibility
- 3 Improves safety compliance and reduces risk.
- 4 Accelerates response time to critical failures
- 5 Improves workflow planning and productivity
- 6 Improves accuracy and reliability of data
- 7 Photo/video capabilities: a picture is worth a thousand words
- 8 No need to invest in special IT infrastructure

Requirements & Configuration

Idhammar MMS can be hosted either within your corporate network, or externally.

On Site:

Managed by your corporate IT department to ensure compliance with local standards

Externally Hosted:

Idhammar MMS and all data can be accessed from the Cloud server, requiring minimal support from the local IT department
