Idhammar company descriptions:

150 words

Idhammar Systems is a leading supplier of manufacturing efficiency solutions with a long history and a reputation for excellence. Our products include Overall Equipment Effectiveness (OEE) and Maintenance Management Systems (MMS) which have proven their worth as a vital component of total productive maintenance and lean manufacturing for a wide-range of clients in prominent blue-chip companies.

Specialising in flexible scalable systems which are highly configurable and easy to use - Idhammar's software is right for companies of all sizes, from single sites to global enterprises. Our products are used extensively in the majority of industry sectors from food to pharmaceutical, chemical, print, transport, energy and many more where our wealth of experience provides a safe pair of hands and a platform for continuous innovation.

Idhammar Systems is an international company headquartered in Bristol, UK, with offices in Scandinavia & Benelux and partners throughout the world.

Company spokespeople

Sales and Marketing Director: John Roberts

Areas of expertise: Idhammar Company, Maintenance Management and CMMS

John Roberts is one of the two founding Managing Directors of Idhammar Systems Ltd. He holds a degree in Mechanical Engineering and a Master's degree in Systems Development which, together with over thirty years of experience in maintenance management, enables John to specialise in facilitating and supporting change management in a wide range of manufacturing and process organisations.

Prior to his current role, John held a variety of roles in FMS Systems (the company which became Idhammar Systems) including Engineering Consultant, Engineering Manager and General Manager. John has also held senior Maintenance Management positions internationally for Saudi Kuwaiti Cement Manufacturing Company in Saudi Arabia, Lamco JVOC in Liberia, BCL in Botswana and ZCCM in Zambia.

Operations Director: Alan France

Areas of expertise: Lean Manufacturing, TPM and Overall Equipment Effectiveness (OEE)

Alan France is the Operations Director for Idhammar Systems. Alan's background includes several years as Maintenance Planning Manager for the largest food companies in Europe, including Grand Metropolitan where he was responsible for maintenance across 33 factories. This extensive experience in lean manufacturing was then fully exploited as Managing Director of Cdata, providing innovative OEE and maintenance software solutions that now form part of the Idhammar Systems portfolio.

Alan is widely acknowledged and respected as a leading expert in lean manufacturing, TPM and OEE and as such is regularly called upon to speak at conferences and events; he is also a contributing editor to a monthly manufacturing maintenance publication in the UK.

Technical Director: Clare Darlison

Areas of expertise: MMS and OEE Systems, and software development

Clare Darlison is one of two founding Managing Directors of Idhammar Systems, following a management buyout of FMS Systems in 2002. Responsible for all development, customisation and integration projects, for Idhammar's systems, Clare draws upon her extensive experience as a software analyst/developer and her Masters degree in Information Technology which included research into systems analysis and requirements techniques.

Clare's first degree was in Geography at Cambridge University with a Post Graduate Certificate in Education. Clare worked as an auditor for Ernst & Young and taught secondary education Geography prior to taking a new career direction having gained a distinction for her Master's degree.
