

Idhammar MMS – a CMMS designed for Maintenance Managers by Maintenance Engineers

Professional browser-based & mobile maintenance

Idhammar MMS is designed to help maintenance teams **maximise asset performance** by providing real-time reporting KPIs to alert Engineers to issues as they arise. With full access to the system via a browser on any approved networked desktop, laptop or smart devices - Idhammar MMS **supports mobile working** to speed up processes and shorten lead times.

Powerful asset data management & real-time reporting

Combining Idhammar's unlimited Asset Management database with **wide-ranging capacity for length and depth of data**, Idhammar MMS is a vital tool for:

Cost control	Health & Safety protection
Planning & managing workload	Secure archive for historical data

Prove compliance with full traceability

Access evidence of environmental, health & safety and regulatory compliance quickly and easily. **Full traceability** of standards of work to support internal and third party audits and inspections. Idhammar MMS supports statutory plus quality compliance standards, including **ISO 9000, ISO 9001, ISO 22000, ISO 13485, TS16949, GAMP, BRC Audit and FDA 21 CFR Part 11**. Additionally, user-restricted access (RBAC) is a standard feature. If the system is hosted by Idhammar it will also comply with ISO 27001:2013 security management requirements.

Idhammar MMS The Business Case	Idhammar REPORTS Browser based, real-time reporting	Idhammar Cloud Flexible delivery, system architecture & licensing options
--	---	---

Core System:

- Asset register
- Skills register
- Planned maintenance
- Analysis
- Inspections
- Work management
- Workload planner
- Stock control
- Purchasing

Reporting:

- Idhammar REPORTS
- Performance reporting
- Dashboards
- Text alerts
- Email notification
- Technical & economic analysis

Additional Functions:

- Mobile & browser functionality
- Purchase agreement
- Auto purchase
- Documents & drawings
- Mobile inventory
- Visual navigator
- FDA compliance
- SCADA connector
- Advanced accounting
- Condition tracking
- Remote working

Integration:

- Idhammar OEE
- Idhammar WCM
- SAP
- Oracle
- CODA
- plus many other systems

Unlock the potential of your asset management operation

Idhammar Job Monitor

Easy to use with time-saving features

Idhammar's intuitive interface makes **data entry painless** and information easy to find and interpret. **Role-based** controls enable users to log in to most-used modules and saved reports for **quick access to 'favourite' functionality**. Idhammar MMS supports the business work flow process by allowing users to set priorities and allocate resources to balance workloads and group tasks within projects.

Purchase as a revenue expenditure

Idhammar MMS is classified as a revenue expenditure rather than a capital expenditure, and is therefore a quicker and more straightforward purchase.

Dedicated implementation, training and support

Idhammar Systems offers a range of services designed to **maximise ROI** through a combination of **consultancy training**, and **ongoing support** that spans from planning, through implementation, to every-day system use.

Our **experienced implementation team** provides assistance and guidance in the configuration of Idhammar MMS to enable all stakeholders to **maximise their understanding** of all significant operational issues and trends in a timely and informative manner.

Supporting you every step of the way, the **Idhammar customer service team** are always working to keep our systems operating effectively in your organisation and to help you with any queries. Our dedicated Account Managers and Engineers are always on hand to provide onsite assistance as required. **If you have an Idhammar System, you have our support and assistance.**

Requirements & Configuration

Idhammar MMS can be hosted either within your corporate network, or externally:

On Site: Managed by your corporate IT department to ensure compliance with local standards

Externally Hosted: Idhammar MMS and all data can be accessed from the Cloud server requiring minimal support from the local IT department

KEY BENEFITS OF IDHAMMAR MMS

1

Maximises asset performance by reducing downtime & demonstrates compliance

2

Easy to use with online & offline capabilities making remote access achievable

3

Flexible reporting - from shop floor to boardroom

Core Idhammar MMS Features

“
Idhammar's highly intelligent maintenance management system is an integral part of the successful operation of the Thames Barrier flood defences
”

Environment Agency

Asset Register - visibility in breadth and depth

The Plant Browser provides insight and clarity of all assets and equipment, including specification history, maintenance plans, costs, bill of materials and documentation.

Work Management - easily prioritise tasks & allocate resources

Manage work orders in real-time, by means of printed work orders or via smart device. The Work Management suite allows users to:

Set priorities with start & completion dates / times

Group tasks within projects

Allocate resources & balance workloads

Describe planned & unplanned work to be done / completed

Identify spare part requirements & estimate costs

View asset history

Workload Planner - time saving revisions with bulk change features

Select a range of related tasks and make checks in order to determine if there are sufficient materials and labour to undertake a job. Reschedule work based on resource availability, priority and demand using the **bulk change / complete feature**.

Skills Register - keep track of qualifications & certificates

Personal Development Records can be associated with all registered employees. Assign qualifications and certificates, with expiry dates where appropriate.

Predictive Maintenance - inspections and condition tracking

Generate and schedule inspection lists, adjusting frequency in-line with failure rates.

Browser & Mobile-Based Maintenance – create work orders on the move

Access essential work management functions without software installation via **smart phones, tablets and browsers** with the Idhammar Mobile MMS application. Create work orders, allocate resources, and issue key documents such as permits to work and health & safety information.

“
Maintenance is a significant part of the business for Ovako Steel – and Idhammar MMS was the natural choice - enabling the sharing of information across our European sites, ensuring straightforward and effective maintenance practice
”

Ovako Steel

Core Idhammar MMS Features

Idhammar REPORTS

Inspections - capture data easily on smart devices

Inspection Round information is **displayed on a single screen** for ease of data capture on smart devices (including iPads). The system can be configured to **prompt users to undertake inspections**. Data is stored in the asset condition history and frequency can be adjusted easily in response to changes in the incidence of equipment failure.

Performance Reporting & Alerts - publish to a range of devices

Idhammar MMS reports and alerts can be communicated to individuals or notification groups automatically and via a range of hardware and display devices including; smartphones, tablets (including iPads), laptops / desktops, Andon devices and networked TV screens. Monitor KPIs and SLAs such as:

Costs

Performance

Plans

Work history

Planned Maintenance - repeat standard jobs with ease

Planned maintenance templates will cover details of work to be completed:

Materials requirements

Special instructions

Estimated times

Scheduling

Stock Control - faster & more accurate with barcode readers

Idhammar MMS stock control module identifies all materials either held in stock or identified as being part of a non-stock catalogue. Stock checking can be undertaken using either printed reports or hand held barcode readers. Idhammar MMS stock control provides:

Detailed transaction history

Reliable stock levels

Automated reordering

Multi-site capability

Purchasing - visibility & control

Requisitions, purchase orders, deliveries, returns, invoices and credits are managed in the Idhammar MMS Purchasing module. Set the approval hierarchy with multi-site role-based authorisation limits.
